PRODUCT

PROFESSIONAL LINE

CITRIC ACID

PRODUCT DESCRIPTION

Citric acid is a food-grade and environmentally friendly product. Given its properties, citric acid is suitable for cleaning tile floors, grout, bathrooms, washing machines, and coffee machines. It effectively removes limescale and cleans metal surfaces.

COMPOSITION

Citric acid – food grade.

DOSAGE DESCRIPTION

Bathroom cleaning – dissolve 50g of citric acid in one liter of water. Cleaning grout and tiles –dissolve 150g of citric acid in one liter of water. Cleaning washing machines and coffee makers – dissolve 150g of citric acid in one liter of water.

INSTRUCTIONS FOR USE

Bathroom cleaning – For bathroom cleaning: add 50g of citric acid to 1 liter of water – use the solution to clean sanitary ware, tiles, etc. Rinse with water after cleaning.

Cleaning grout and tiles -add 150g of citric acid to 1 liter of water – use the solution to clean grout, tile floors, etc. Apply the solution using a mop or cloth. Rinse with water after cleaning.

Cleaning washing machines and coffee makers – dissolve 150g of citric acid in one liter of water. Do not put dishes inside your machine. For each machine cleaning, add approximately 100ml of solution to the detergent dispenser. Run a normal wash cycle. After the wash cycle is complete, your machine will be impeccably clean and ready for subsequent washes.

PHYSICAL CHARACTERISTICS AND CHEMICALS

Appearance and color: White crystalline solid.
Fragrance: Characteristic
pH of 5% solution (at 20 ºC): 1.85 +/- 1
Viscosity: NA

PRESENTATION OF PRODUCT

Packaging sizes of 1 kg and 25 kg.
